CleanLeaf

A community wellness ecosystem

Clarissa Karki · Ecem Ipek · Tanvi Mahadik · Chris Kapsalis

Whitman Dean's Sustainability Challenge 2026

Meet Maya

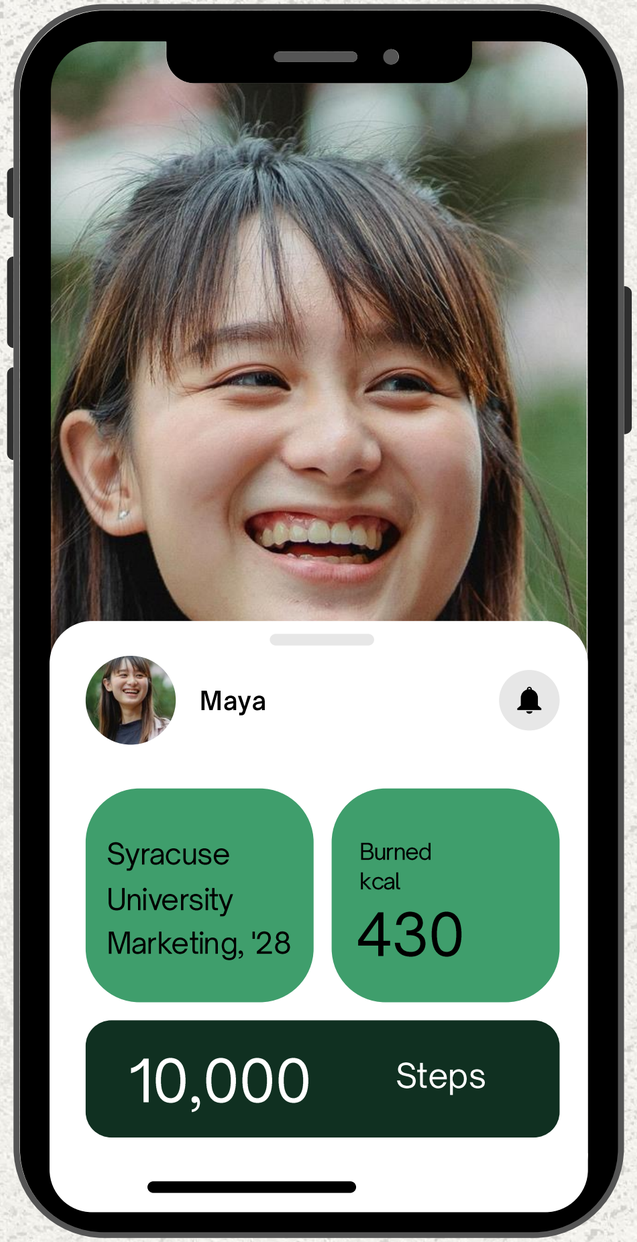
SOPHOMORE. STRESSED. BUSY. TRYING TO EAT WELL.

She downloads a wellness app.

Week 1: consistent **Week 2:** midterms **Week 3:** the app is forgotten.

The app failed Maya.

No accountability. No community. No habit formation.



The problem is far bigger than we think.

80%

of corporate wellness programs see <20% participation

73%

of employees ignore health apps after the first week

$300 B

lost annually in workplace productivity from poor nutrition

People don't need another app.

They need a nudge.

The Competition

APP DOWNLOAD

Individual habit tracking
No social context
→ Abandoned

Product in Market: Yuka

WELLNESS PROGRAM

Additions to people's lives, not embedded in them

Product in Market: Noom

The Solution

The average person uses 3+ messaging platforms daily. CleanLeaf meets them there.

B2B2C Businesses pay. Their people benefit.

TIER 1 THE CLIENT

B2B CLIENT

Corporation or University

Pays for the platform · Sets SDG goals · Onboards their community

deploys platform

TIER 2 THE PLATFORM

THE ENGINE

CleanLeaf AI Engine

Admin dashboard · AI challenges · Targeted messaging · SDG reporting

delivers programs

TIER 3 THE PEOPLE

NO FRICTION

Employees or Students

Receive nudges · Log meals · Build habits · No app download required

SDG reports flow back

CleanLeaf

- Community-first model
- No app download needed
- Lives in WhatsApp, iMessage, Teams
- AI personalises every nudge
- Habit sticks. Impact scales.

Why CleanLeaf Works

Science-backed healthy habit formation loop that stays beyond users' platform use

Pricing

STARTER	GROWTH	ENTERPRISE
$6/user/year	$2/user/year	Custom Contract
up to 1,000 users	*1,000-10,000 users*	*10,000+ users*
70% gross margin		

Institutions spend $150-$500/person/year on wellness. CleanLeaf starts at $2.

6 running

Go Vegetarian — 30 days	438 enrolled · Day 8 of 30	74% completion
Hydration — 2L/day	312 enrolled · Day 8 of 14	81% completion
High fibre week	289 enrolled · Day 8 of 7	65% completion
No ultra-processed foods	201 enrolled · Day 8 of 21	52% completion
Protein focus	176 enrolled · Day 8 of 14	70% completion

AI suggestions for your cohort

✨ Powered by Gen AI

NEW RECOMMENDATION

Engineering students show lower fruit intake vs campus average. Launching a "Rainbow Plate" 7-day challenge is predicted to achieve 68% join rate.

Launch this challenge

TRENDING IN COHORT

Mediterranean week shows high engagement potential based on last semester. Predicted 72% join rate among Business students.

Schedule for next week

EXAM PERIOD INSIGHT

Caffeine consumption spikes 3× during finals. A "Cut the Caffeine" challenge correlates with improved sleep scores in similar cohorts.

IMPACT FRAMEWORK

Driving Impact: Our SDG Contribution

Our platform aligns employee wellness with global sustainability goals.

SDG 3: Good Health & Well-Being

Personalized Wellness

AI builds custom nutrition tracks
Collect simple data from each meal log.

Effortless Daily Tracking

Zero friction, daily habit.
See what they eat and how prosessed.

Behavior Change at Scale

Consistent nudges shift entire workforces toward better nutrition over time.

Motivated by Progress

Ongoing reward.
Track changes in their eating habits and if they keep it after the challenge ends.

TARGET: BUILD CONSISTENT HEALTHY EATING HABITS ACROSS THE ENTIRE WORKFORCE

IMPACT FRAMEWORK

Driving Impact: Our SDG Contribution

Our platform aligns employee wellness with global sustainability goals.

SDG 12: Responsible Consumption & Production

Conscious Food Choices

Tracking eating habits. How many meals go from highly processed to more natural.

Visible Impact

Environmental footprint of each food choice.
Did they try plant-based food during challenge?

Culture of Sustainability

Group leadboards normalize responsible consumption as a shared workplace value.

Measurable Reporting

This shows responsible consumption at the individual level.

TARGET: REDUCE THE ENVIRONMENTAL FOOTPRINT OF DAILY FOOD CONSUMPTION COMPANY-WIDE
